

Netflix Integration Announcement Fact Sheet

What's new in this release?

i.TV--now with Netflix

- Search results now include over 100,000 DVD titles from Netflix, in addition to TV programs, in-theater movies and detailed show information and cast lists.
- Discover Netflix DVD titles by tapping the 'Watch' button from any TV or movie details screen.
- Easily reorder or delete items in your Netflix queue from within the My Media tab.
- Add movies and TV episodes to your Netflix instant watching queue, allowing you to instantly stream content to your Windows PC, Xbox 360, Roku box, TiVo® Series3, TiVo HD, or TiVo HD XL digital video recorders and select Blu-Ray players. (Mac support by end of 2008).

Wikipedia Integration:

Wikipedia articles now linked to most show, movie and actor screens.

TV Listings Improvements:

- Many new TV service providers added
- Over The Air digital sub channels now available
- Indicator when a show is NEW
- Display option to show only NEW programming

Movie and Theater Improvements:

- Movies can now be displayed alphabetically, by star rating, by content rating, and now by location.
- Use device location services to find movies and theaters near your current location.
- Movie and theater data is now separate from TV listing data, allowing you to specify a different location for your theater and movie listings.
- Trailer quality improvements

Misc. Improvements:

- Reviews now easier to navigate
- Simplified account creation
- Bug fixes and performance improvements
